PETITION UNDER 37 C.F.R. § 1.182 TO WITHDRAW THE
ERRONEOUS TERMINAL DISCLAIMER

BOX REISSUE

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

The undersigned, on behalf of the applicants for the reissue of METHOD OF MANUFACTURING POWDERED DEER BLOOD, U.S. Patent No. 5,637,345 (the '345 patent), granted to applicants on June 10, 1997, respectfully petitions to withdraw the terminal disclaimer dated September 6, 1996, which was filed during prosecution of the '345 patent.

The following facts show that the patent number 5,460,677 (the '677 patent) identified in the September 6, 1996 terminal disclaimer was a clerical error. The correct patent that should have been included in the terminal disclaimer is U.S. Patent No. 5,505,980. The reissue application was filed to correct this error.

Statement of Facts

On January 11, 1996, United States Serial No. 584,748 was filed relating to a method of manufacturing powdered deer blood. The '748 application is a CIP of U.S. Patent No. 5,505,980. In an Office Action dated June 3, 1996, the Examiner made a rejection of claims 1 - 10 of the application under the judicially created doctrine of obviousness-type double patenting in view of U.S. Patent No. 5,505,980. A copy of the Office Action is attached as Exhibit A.

In response to the Examiner's Action, a Terminal Disclaimer To Obviate A Double Patenting Rejection was filed on September 6, 1996. The terminal disclaimer inadvertently identified U.S. Patent No. 5,460,677 as the patent beyond which the terminal portion of the present patent would not extend. A copy of the originally filed Terminal Disclaimer, which contains the error, is attached as Exhibit B.

The '677 patent (attached as Exhibit C), however, is neither owned by the applicant nor does it relate to the subject matter contained in the '345 patent. The parent patent, U.S. Patent No. 5,505,980, attached as Exhibit D, which is owned by the applicant, should have been referred to in the September 6, 1996 terminal disclaimer. The '980 parent patent relates to a method of manufacturing powdered deer blood. The unrelated '677 patent relates to a filament winding production method for a micropin array. It is clear from Exhibit A and the other documents in the record that the September 6, 1996 terminal disclaimer should have disclaimed a term not extending past the expiration date of the '980 patent.

The application matured into U.S. Patent No. 5,637,345 when the Examiner mistakenly accepted the terminal disclaimer without noticing the wrong patent number set forth therein.

Applicants filed a reissue application on August 21, 2001 to correct the error. Applicants filed a Corrected Terminal Disclaimer To Obviate A Double Patenting Rejection together with the Reissue application. However, the Examiner advised the applicants that this Petition was necessary to remove the original, incorrect Terminal Disclaimer.

The Examiner also indicated that Applicants Corrected Terminal Disclaimer To Obviate A Double Patenting Rejection was not found in the file. Accordingly, a new Terminal Disclaimer is being filed concurrently with this Petition.

Requested Relief

In view of the above, applicants respectfully request that the September 6, 1996 terminal disclaimer be withdrawn so the Corrected Terminal Disclaimer To Obviate A Double Patenting Rejection, dated July 3, 2002, filed concurrently herewith in the reissue application, can be entered to correct the error.

Respectfully submitted,

Serial No. 584748
Art Unit 1302

-2-

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-10, drawn to a method of making powdered deer blood, classified in Class 426, subclass 385.

II. Claims 11-15, drawn to a powered deer blood product, classified in Class 424, subclass 464.

2. The inventions are distinct, each from the other because of the following reasons:

3. Inventions I. and II. are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by a materially different process, e.g. a process which omits the freezing and ~~cutting~~ cutting steps or just the cutting step.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Janice Sharp on May 24, 1996 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-10. Affirmation of this election must be made by applicant in responding to this Office action.

Claims 11-15 stand withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention.

6. The Abstract of the Disclosure is objected to because it must be submitted on a separate sheet of paper. Correction is required. See M.P.E.P. § 608.01(b).

7. Claims 1, 7 and 8 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, last line, "down" should be cancelled. Claims 7 and 8 are indefinite since it is not clear what is intended by "towards the end of the freeze drying". At what point in the freeze - drying step does this occur? Corrections are required without new matter.

8. Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 5,505,980. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to eliminate the ethanol addition in the claims of 5,505,980 if deer blood sterilization is not a concern.

9. The non-statutory double patenting rejection, whether of the obvious-type or non-obvious-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*,

A timely filed terminal disclaimer in compliance with 37 CFR 1.321 (b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78 (d).

Effective January 1, 1994, a registered attorney or agent of record may sign a Terminal Disclaimer. A Terminal Disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

TERMINAL DISCLAIMER TO OBVIATE
A DOUBLE PATENTING REJECTION

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

Petitioners' representative, on behalf of Petitioners, Youn S. Lee, residing at 4 March Place, Belfast, Christchurch, New Zealand; and Hyung S. Lee, residing at 125-3 Kalak-Dong, Songpa-Ku, Seoul, Korea, represents that National Deer Horn Limited having a place of business at 4 March Place, Belfast, Christchurch, New Zealand, is the owner of the entire right, title and interest in U.S. Patent Application Serial No. 08/584,748, filed on January 11, 1996 and entitled, HEALTH FOOD PRODUCT INCLUDING POWDER MADE FROM DEER BLOOD AND A METHOD OF MANUFACTURING THEREFOR.

Petitioners' representative hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the above-identified application, which would extend beyond the expiration date of the full statutory term of U.S. Patent No. 5,460,677 and hereby agrees that any patent so granted on the above-identified application shall be enforceable only for and during such period that the legal title to said patent shall be the same as the legal title to U.S. Patent No. 5,460,677, this agreement to run with any patent granted on the above-identified application and to be binding upon the grantee, its successors, or assigns.

In making the above disclaimer, Petitioners' representative does not disclaim the terminal part of any patent granted on the

above-identified application that would extend to the full statutory term as presently shortened by any terminal disclaimer of U. S. Patent No. 5,460,677, in the event that any such issued patent: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321(a), has all claims cancelled by a reexamination certification, or is otherwise terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer, except for the separation of legal title stated above.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
